7. YEAR WISE PLAN OF WORK

First year plan

- Collection and consultation of the major carps and find about their growth parameters.
- To examine the physiochemical characteristics of different major carps for site1.
- To examine the biochemical composition of different major carps for site1.

Second year plan

- To study about the physiochemical characteristics of different major carps for site 2.
- To Examine the biochemical composition of different major carps for site 2.
- Comparative biochemical analysis on basis on season.

Third year plan

- Statistical analysis of the data and interpretation of results.
- Presentation of result in the form of research papers in research journals.
- Compilation and submission of work in the form of thesis.
